

NO NUCLEAR WAR

Following the Russian invasion, the people of Ukraine are suffering and the country is paying a heavy economic and human price. The conflict also presents a much wider threat: the existential threat of a nuclear war between the United States and Russia. Between them they have almost 12,000 nuclear weapons—some are 100 times the power of the Hiroshima bomb. The possibility of nuclear war is the greatest for many decades.

We, the undersigned, call on the government to:

- Get all parties to the negotiating table to urgently bring the war to an end;
- Work towards a world without nuclear weapons so we are not threatened with a nuclear conflict ever again.
